

Automatic Ultra Clean Trolley HGT-2750-PNU-V3x

Description:

Mobile equipment and high productivity studied for repetitives and specialized applications to prepare horizontal surfaces.
 This machine is suitable for an efficient cleaning about land surfaces, industrial walkable surfaces, grided supports or cabin floor.
 Endowment with spray bar balanced with Multi-Jet housing to remove in a fast and effective way dirt, paints, oxides or thick sediments.
 It has a rotating swivel specialized in ultra high pressure with pneumatic integrated motor (selection of high speed and couple).
 Holding device with simplify reset of "UHP rotating seal" on line.
 Complete interchangeability of use with connections to Airmation high pressure unit or a safety column (high pressure part and pneumatic pilotage) similar to the manual gun.

Base Features:

- Max Continue Pressure: 2750 bar
- Safety activation: pneumatic
- Pilotage signal of high pressure: Pneumatic to By-Pass machine
- Max cleaning land path: 6"/8" (according to the spray bar used)
- Numer of nozzles: 6/10 (according to the available flow)
- Approximated dimensions: 960x410xh1000mm
- Connections: n.1 high pressure 3/8" UHP
 n.2 pneumatic hose DN 1/4" - DN 3/8"

Optional:

High pressure activation by-pass (on frame cart)
